

## MONK-1 - 6 runs of tree building and pruning

blue: without pruning

red: with pruning

Pruning doesn't really improve the quality of the classification.

The optimal partition seems to be about 0.6 for training and 0.4 for pruning.

### MONK-3 - 6 runs of tree building and pruning

blue: without pruning

red: with pruning

Pruning doesn't really improve the quality of the classification.

The optimal partition seems to be about 0.6 for training and 0.4 for pruning.
